

After reading your chosen myth, do research on the tribe of Native Americans that the legend came from and create a brief presentation about that tribe and your myth. Include information about where the tribe lived, what they are known for, what is known about them, what has happened to the tribe through the last 400 years and any other information you find important for us to know about your tribe. For your myth, briefly summarize the myth, describe what kind of myth it is and present the types of characters present in the myth. Also discuss the elements that your myth has in common with the ones we read in class and with the creation/origin myths that you are familiar with.
